

Bartosz Oleksy

Junior Front End Developer

I am a 4th year computer science student. I started gaining my experience in IT during student internships and creating my own projects on github. I am a person who assimilates knowledge very quickly and easily adapts to new work environment. I am ambitious and hardworking, I enjoy learning new things and thus developing and improving my skills and qualifications. I am looking for a remote job as a Junior Frontend Developer, because web programming is a field that I truly like and enjoy, so I would like to develop in this direction.
